About Us

We are a leading manufacturer and exporter of electrical materials to over 40 countries.

We have a wide range of electrical materials available, including cables, electric panels, medium voltage transformers and switchgear, generators, lighting solutions, street poles etc.

We also offer custom electrical solutions, so if you have a specific need, we can work with you to create a solution that meets your exact requirements.

We are your one-stop contact for all of your electrical needs. We have a team of experienced engineers and technicians who can help you with everything from product selection to installation.

Street lighting is an essential element of urban and rural infrastructure, playing a vital role in establishing safety for pedestrians and drivers alike. The global trend is shifting towards updating streetlights to LED lighting, which not only consumes less energy but also offers improved reliability compared to traditional sodium lamps. This transition significantly reduces the expenses associated with maintaining well-lit streets. Crafted as a fully optimized LED street and area lighting solution, our street light system delivers remarkable efficiency without compromising on quality.
